

HECAT® FAC-400 PULSATOR®

Solvent Recycling A/C Component Flusher

Meets or Exceeds OE Requirements. Essential tool for Ryder Transportation Service Centers.
Meets current Hawker-Beechcraft & King Air specifications for Business Aircraft A/C repair.

Operator and Environmentally friendly features provide for a rapid Return on Investment (ROI). The high flow rate combined with the powerful kinetic energy of the **PULSATOR®** process (US Pat. #9233404) will remove the oils and debris from the parallel paths of even the most complex micro channel components. Something the spray can, 1qt flush gun, and the laminar flow of simple circulating systems; just cannot.

Lifetime Warranty
